PROFESSIONAL SUMMARY

Electronics & Telecommunication undergraduate with experience in frontend development, UI/UX design, and web application development. Contributed to healthcare, accessibility, and career guidance platforms through academic projects and startup collaboration. Interested in building scalable, user-centric, and impactful digital solutions using modern software development practices.

EDUCATION

Vishwakarma Institute of Information Technology (VIIT), Pune 2023 – 2027
B.Tech in Electronics & Telecommunication · CGPA: 8.13

Mudhoji College, Phaltan 2021 – 2023
HSC: 83.17% · MHT-CET: 91.64 percentile

EXPERIENCE

UI/UX Intern — Cyber Paradox, Pune July 2025 – October 2025

- Designed UI/UX workflows, wireframes, and visual assets for startup MVP development.
- Worked on icon selection, color palette design, error page interfaces, and responsive UX improvements.
- Researched modern UI/UX references on Behance and AI-based design tools for intuitive, consistent interfaces.

TECHNICAL PROJECTS

Personalized Multi-Sensor Cardiac Rehabilitation System — Healthcare IoT Platform

- Developed responsive frontend dashboards for real-time healthcare monitoring and biomedical sensor data visualization.
- Designed user-centric interfaces for rehabilitation tracking and cloud-based patient monitoring.
- Contributed to the patent “A Personalized Multi-Sensor Cardiac Rehabilitation System” (The Patents Act, 1970).

NextStep — Personalized Career Guidance Platform

- Developed responsive frontend interfaces, interactive dashboards, and quiz workflows.
- Improved engagement through intuitive UI design and structured recommendation-based user flows.
- Contributed to scalable frontend architecture as part of the Smart India Hackathon project.

Claire — AI Accessibility Platform for Dyslexic Learners

- Contributed to accessibility-focused UI concepts and personalized readability features.
- Worked on AI-based summaries, quizzes, and adaptive reading experience improvements.
- Researched multilingual accessibility features and user-centric learning interfaces.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, SQL, HTML, CSS, React.js (basics)
UI/UX: Figma, Canva, Wireframing, Prototyping, User Research
Tools: Git, GitHub, VS Code, Power BI
Core Areas: DSA, DBMS, OS, Computer Networks, OOPs, Full Stack Development, Machine Learning (basics)

CERTIFICATIONS

- IBM Full Stack Software Developer Certification
- Infosys Springboard — Pragati Path to Future Mentorship Program
- Smart Cart Using Analog Circuit — Published in IEEE (2024)

ACHIEVEMENTS & LEADERSHIP

- Finalist — GENAITHON 2K25; selected for Smart India Hackathon 2025 (PPT round).
- Design Team Head — WEC Club: created posters and social media creatives; NSS Volunteer.
- 1st Prize — Firodiya Karandak 2024, individual Rubik's Cube Art.
